Glueing made easy thanks to Tenso P

Do you still glue furniture components with clamps or adhesive tape? You don't have to! Glue without waiting, using clamps or reworking at any angle – in a record time of 40 seconds per connector.

Fastest joining system with a power tool

Connection is complete within seconds, without waiting time, clamps, or secondary processes

-  25" Cut
-  5" Insert
-  5" Apply glue
-  5" Connect

40" Finished!

How it works:

1.

Cut all components.

2.

Slide in the connectors.

3.

Apply glue.

4.

Press in the preload-clip to make it easier to join the components.

5.

Assemble the components.

6.

Ready-glued carcass without waiting times and without any clamps or adhesive tape.
